SECTION EIGHT

# The Client Problem

**ProudSmart is a business  
which sells complex  
technology solutions**

A online learning platform will enable ProudSmart to drive more value out propriety technologies through educating:

- Internal staff
- Customers
- Partners
- Students

# Project Goals

*Our MVP focused on 4 critical features.....*

1

## Permission based access

Different user types have different access to course content

2

## Live streaming of course content

Leveraging third party services to host and stream content

3

## Payments

Ability to accept payments from users

4

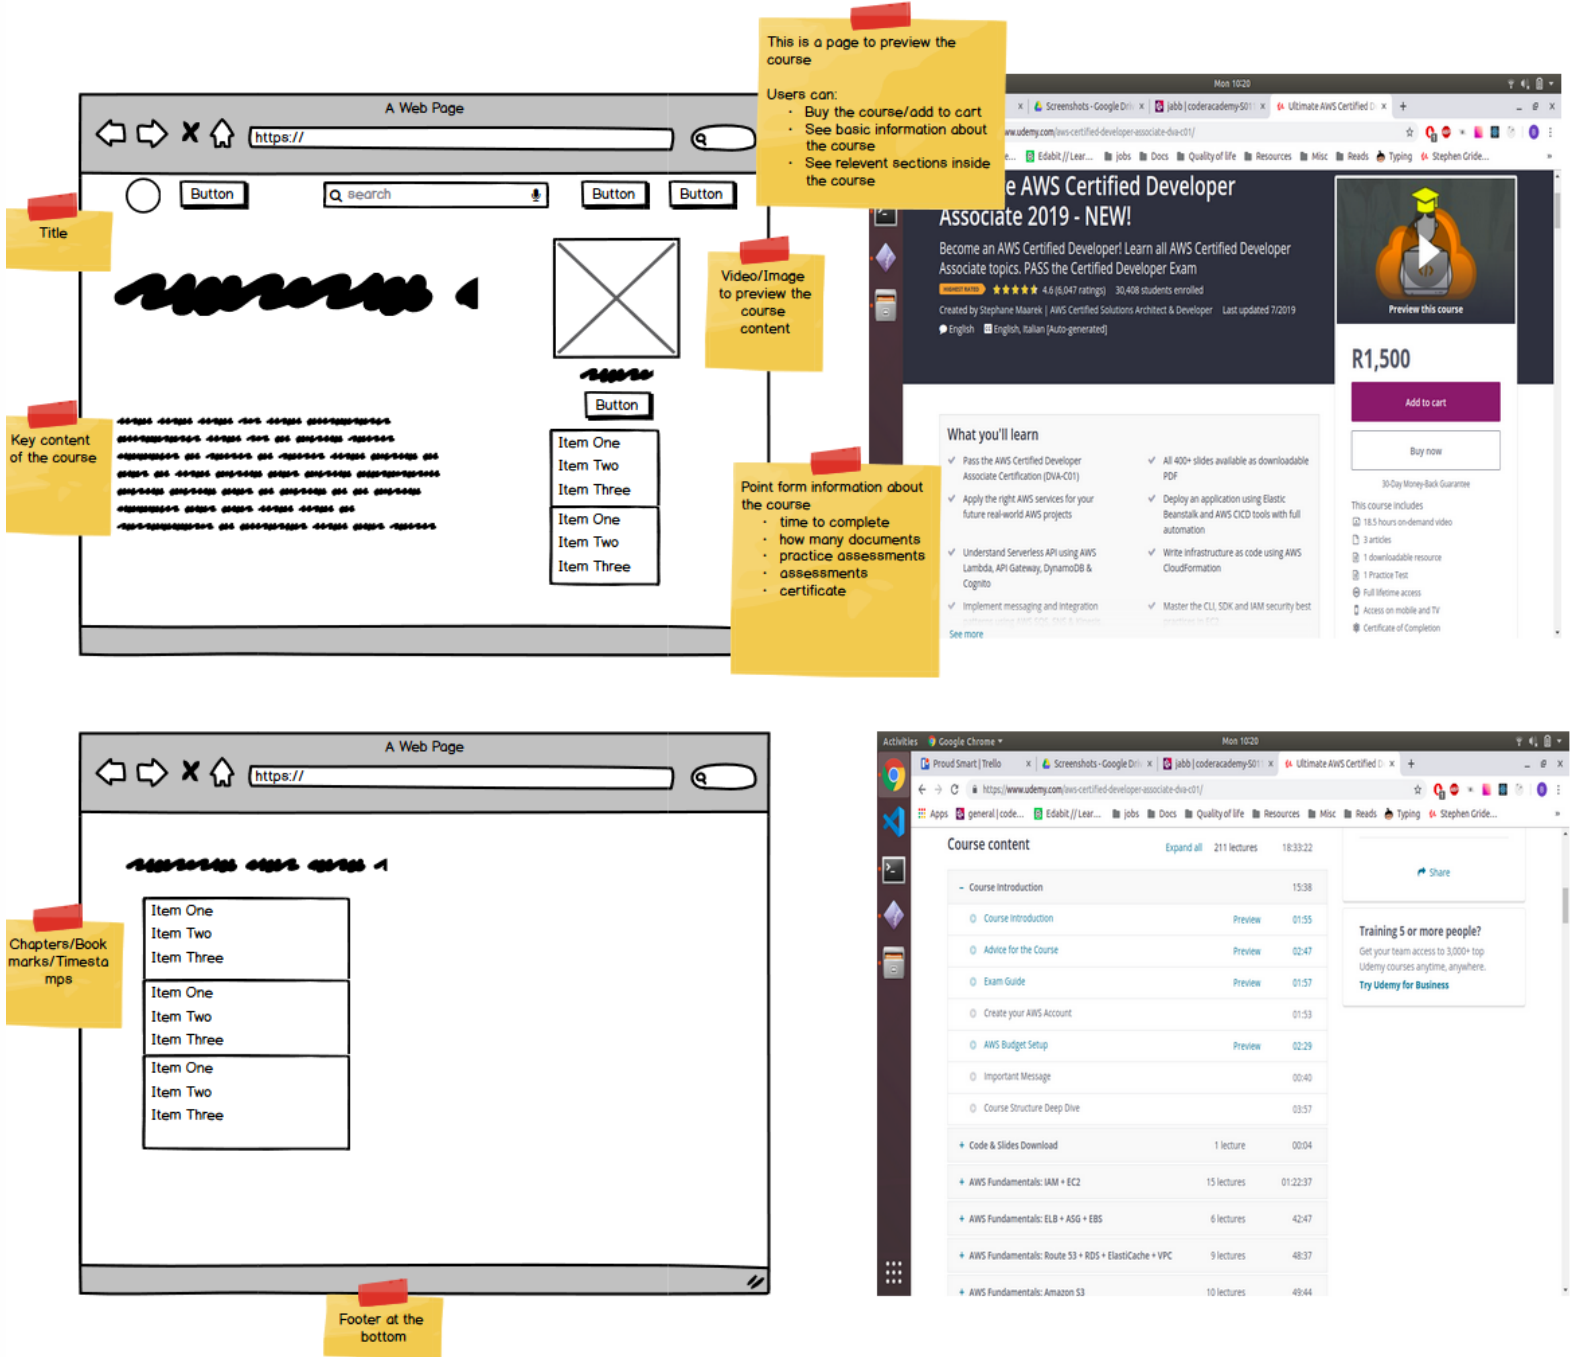

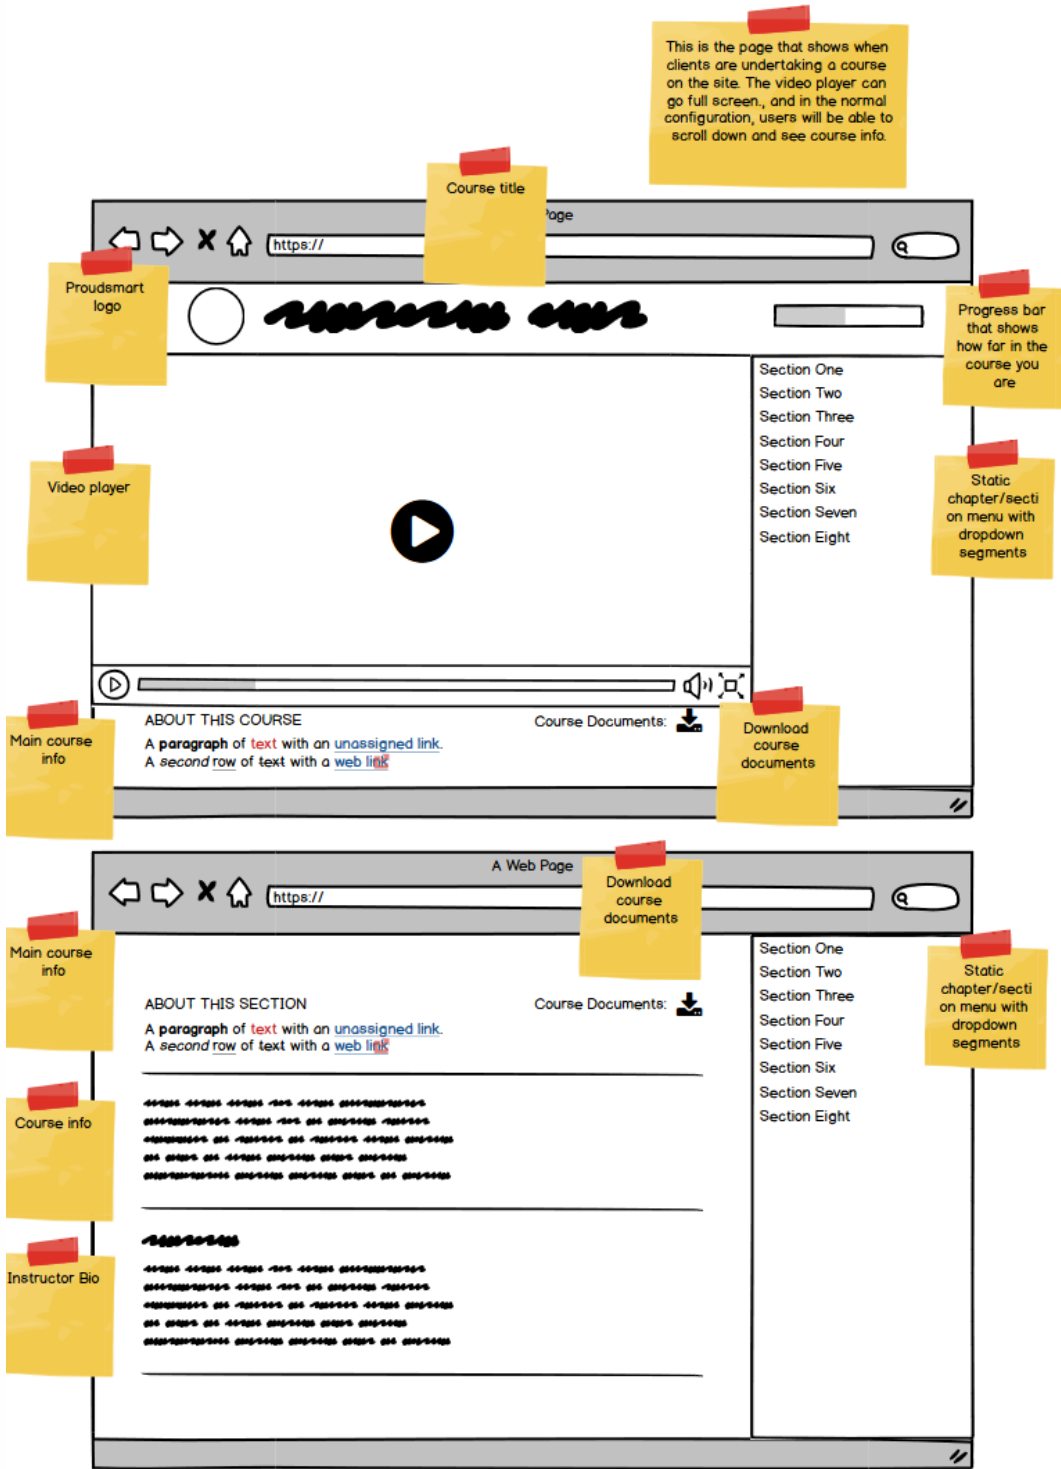

## Content creation

Ability for educators to upload course content

# Project Workflow

---

We separated front and back end responsibilities to simplify project delivery and reduce overall rework

# Key Challenges

---

- Implementing live streaming
- Handling state
- Addressing roadblocks
- Managing client expectations

# Ethical Issues

---

- Accessibility considerations
- Piracy risk
- Content censorship
- Disguised sales medium

# Favorite Parts

Investing lot’s of time into planning early on in the project ensured strong teamwork and communication throughout the project
